# **Worksheet 1: A Coalition Planning Tool**

This form should be completed by a steering committee, a community group, or others who have come together to start an adolescent health initiative. Completing this form will help the group begin to shape the initiative and determine who should be involved. In the spaces provided, please answer the questions listed, which are about history, norms, and politics around the Critical Health Objectives; which key stakeholders should be involved; what resources are needed; what other efforts are taking place in the community; and what is the best course of action for engaging the community to meet the needs of adolescents. This form can also be used to facilitate a group discussion.

| What are the history and status of adolescent health and the Critical Health Objectives in the community?                      |
|--|
| How does the community view these issues? What is the current political and social climate in relation to these issues?        |
|  |
|  |
| Who is concerned about and affected by these issues? Who has participated in the past? What is their relation to these issues? |
|  |
|  |
| Who has not participated, and why haven't they been involved in these issues?  |
|  |
|  |
| What existing youth-focused groups or efforts address these issues? With which, if any, could we collaborate?                  |
|  |
|  |
| Do we have sufficient information and resources?   |
| What information and resources (administrative, financial, and structural) do we have right now to work on this issue?         |
|  |
|  |
| What resources are we lacking?   |
|  |

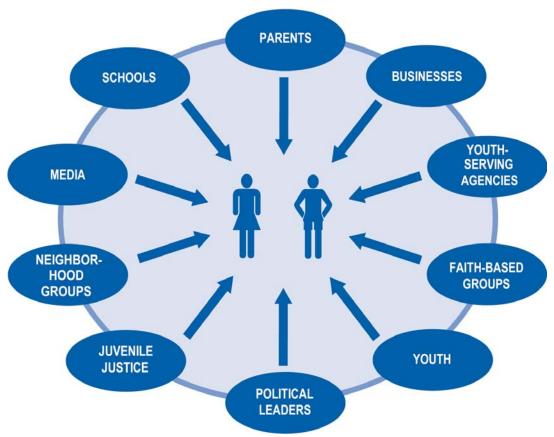

| Does a current needs-and-assets assessment exist in the community?   |
|--|
|  |
| What are the advantages or disadvantages of using this assessment?   |
|  |
| What are the possible benefits and challenges of conducting a new needs-and-assets assessment?                     |
|  |
| Is working as a collaborative or a coalition the optimal option?   |
| Will working as a group help achieve goals that cannot be achieved independently?                                  |
|  |
| What are the pros and cons of working in a coalition or a collaborative right now?                                 |
|  |
| How official or formal do we want to be?   |
|  |
| Do we want to be identified with another organization working on this issue or in a parallel area? Why or why not? |
|  |
| What do we want to accomplish in the short term?   |
|  |
|  |

Do we have a long-term goal? What do we want to accomplish in the future?

#### **Worksheet 2: Coalition Self-Assessment**

This form should be completed by coalition members to assess how the group is functioning. Answers will be used to determine areas in which the coalition can improve. Respondents should rate how well the coalition measures up to each statement below. Using a scale of 1 to 5, circle the number that best fits your opinion. Please answer each question as honestly as possible. Your name will not appear anywhere on this form.

| Staffing and Resources   | Not At All |   | Somewhat   | Outstanding |        |
|--|------------|---|--|-------------|--------|
| The coalition has stable staff.  | 4          |   |  | 4           |        |

(2000). *Coalition self-assessment tool.* Retrieved September 23, 2002, from <a href="http://www.ncdiabetes.org/WhatWeDo/pdf/Coalition\_Self-Assessment\_Tool.pdf">http://www.ncdiabetes.org/WhatWeDo/pdf/Coalition\_Self-Assessment\_Tool.pdf</a>

#### **Worksheet 3: Needs Assessment Team Planning Tool**

Use this worksheet to identify the skills, resources, and expertise the coalition will need to conduct a needs assessment; how to access those resources within the community; and who should serve on the needs assessment team. The list of resources will most likely include items such as research and data skills, expertise in the area of best practices, entrée into the schools, and funding. In creating such a list, the coalition may find that many of the resources it needs can be found within the coalition. For missing resources, this tool can help the group identify organizations with which it might want to partner or contract, and people it might recruit to participate in the needs-and-assets assessment process.

| Skills Resources,<br>or Expertise Needed<br>(e.g. in-kind, technical<br>expertise, skills, funds) | Individual, Organization,<br>or Institution That Can<br>Provide Resources | Contact Information | Person Willing to<br>Contact |
|---|---|---------------------|------------------------------|
|   |   |                     |                              |
|   |   |                     |                              |
|   |   |                     |                              |
|   |   |                     |                              |
|   |   |                     |                              |

#### **Worksheet 4: Needs Assessment Questions**

Use this worksheet to brainstorm a list of questions to guide the needs-and-assets assessment. You may find that, depending upon the topic the community is exploring, all the questions may not be relevant. After brainstorming, the coalition will need to narrow the list by prioritizing questions. Prioritizing should be guided by the resources available to the coalition, the previously agreed-upon scope and depth of the assessment, and the relevancy of the questions.

#### **Worksheet 5: Needs Assessment Data Chart (Youth Profile)**

Use these worksheets (5, 5.1, 5.2) to map out what information is needed to answer each needs-and-assets assessment question, the sources of data, how data will be collected, who will collect it, and the time frame. Complete the applicable worksheet for each segment of the assessment (youth profile, community resources, environment and norms).

| Needs<br>Assessment<br>Question  | Information<br>Needed to<br>Answer<br>Questions                                 | Sources of<br>Existing Data                         | Data to be<br>Collected<br>(if existing<br>data are not<br>available) | How Data<br>Will Be<br>Collected | Persons/<br>Group<br>Responsible | Time Frame |

| Question o.   |  |                             |   |                                  |  |            |
|   |  |                             |   |                                  |  |            |
|   |  |                             |   |                                  |  |            |
|   |  |                             |   |                                  |  |            |

#### **Worksheet 6: Prioritization**

On a scale of 1-5, please indicate the degree to which you think each proposed strategy will be effective and supported by the community. All answers will be averaged and used to help prioritize strategies for the community action plan.

| Proposed Strategy | Community Support |      |   | Effectiveness |    |   |     |   |     |   |
|-------------------|-------------------|------|---|---------------|----|---|-----|---|-----|---|
|                   | V                 | Veak |   | Stro          | ng |   | Low |   | Hig | h |
|                   | 1                 | 2    | 3 | 4             | 5  | 1 | 2   | 3 | 4   | 5 |
|                   | 1                 | 2    | 3 | 4             | 5  | 1 | 2   | 3 | 4   | 5 |
|                   | 1                 | 2    | 3 | 4             | 5  | 1 | 2   | 3 | 4   | 5 |
|                   | 1                 | 2    | 3 | 4             | 5  | 1 | 2   | 3 | 4   | 5 |
|                   | 1                 | 2    | 3 | 4             | 5  | 1 | 2   | 3 | 4   | 5 |
|                   | 1                 | 2    | 3 | 4             | 5  | 1 | 2   | 3 | 4   | 5 |
|                   | 1                 | 2    | 3 | 4             | 5  | 1 | 2   | 3 | 4   | 5 |

#### Instructions for Using the Prioritization Survey

- Use this survey with a group that offers broad representation of community stakeholders and viewpoints.
- Results may be used to prioritize strategies, or they may indicate a need to revise strategies and survey the group again.
  - 1. Distribute the survey and describe to respondents what is meant by community support and effectiveness:
    - Community Support—Will the community find this strategy controversial, culturally appropriate, or a necessary expense? Will it consider the strategy a priority? These are examples of what respondents should consider when ranking each strategy for community support.
    - Effectiveness Respondents should consider whether each strategy is based on best practices, whether the strategy will target young people most at risk, and whether the community has the resources to implement it.
  - 2. Review survey responses: Someone will need to average the ratings for community support and effectiveness for each strategy. The results can be summerized in a table similar to this one:

| Strategy                                      | Community Support | Effectiveness |
|---|-------------------|---------------|
| Change school lunch menus                     | 3.7               | 4.5           |
| Do away with candy machines on school grounds | 1.8               | 3.9           |

3. The coalition will need to decide what strategies constitute higher and low priority for community members based on these ratings. One way to use this information to prioritize strategies is to create a ranking system similar to this one:

High Priority ‡igh community support, high effectiveness Priority ‡ow community support, high effectiveness Low Priority ‡igh community support, low effectiveness Last Resort ‡ow community support, low effectiveness

#### **Worksheet 7: Writing Goals and Objectives**

Use this worksheet to create goals and objectives for your intervention. Copy extra sheets as needed.

**Goals** are *long-term outcomes* of an intervention that a community hopes to achieve over a significant period of time. A typical intervention has only one or two major goals, which may be pursued through multiple objectives.

**Objectives** are *short-term outcomes* and should be thought of as pathways to goals. They can be measured at the completion of a program or several months afterward.

When developing goals and objectives for an action plan, it is important to:

- Clearly link each objective to a goal.
- Be sure that both goals and objectives are **measurable**.
- Be specific about the **geographic area**, **target population**, and **time frame** of each goal and objective.

| Goals  | Objectives   |
|--|--|
| By 2006, motor vehicle injuries among teenagers living in the state aged 16–19 will decrease by 20%. | By 2003, there will be a 25% decrease in the number of adolescents aged 16–19 who have ridden in a car with someone who has been drinking. |
|  | By 2004, 75% of adolescents will be able to identify at least four strategies for preventing motor vehicle injuries.                       |
|  | By 2005, the number of adolescents aged 16–19 who wear a seatbelt will increase by 25%.  |
|  |  |

|  |  |

#### **Worksheet 8: Linking Program Components with Goals and Objectives**

Once goals and objectives have been identified, use this worksheet to link them with program components or activities. If matching a particular component to your goals and objectives seems difficult, you may need to abandon this approach and find a more appropriate strategy. Completing this worksheet will help the coalition focus its efforts. Complete the table from right to left by first filling in the Goals and Objectives columns, then filling in the program components that relate to them. It may help to draw arrows between program components and the goals and objectives to which they correspond, as some components will address more than one goal and objective.

| Level             | Program Component | Objectives | Goals |
|-------------------|-------------------|------------|-------|
| Individual/Family |                   |            |       |
|                   |                   |            |       |
| School/Peers      |                   |            |       |
|                   |                   |            |       |
| Community         |                   |            |       |
|                   |                   |            |       |
| Policy/Society    |                   |            |       |
|                   |                   |            |       |

#### **Worksheet 9: Action Plan Worksheet**

Use this worksheet to create an action plan, or work plan, that will guide implementation efforts. A separate sheet can be completed for each program component. Make copies as needed.

# **Program Component:**

| Responsible                                    | Data to be<br>Completed | Resources<br>Required   | Potential<br>Barriers or<br>Resistance   | Collaborations   |
|--|-------------------------|---|--|--|
| Adult leaders, college mentors, Emilio, Cathy. | April 30, 2007.         | Transportation, handouts, easel, paper, food, supervision, stipend. | Transportation, inability to recruit interested youth, parents concerned about their children participating. | Principal, PTA, student council, minority student union, business leaders (to pay stipends).   |
|  |                         |   |  |  |
|  |                         |   |  |  |
|  | college<br>mentors,     | college<br>mentors,   | college handouts, mentors, easel, paper, Emilio, Cathy. food, supervision,                                   | college handouts, easel, paper, food, interested supervision, stipend. inability to recruit interested youth, parents concerned about their children |

#### **Worksheet 10: Creating a Logic Model**

This worksheet will help you create a logic model, which clarifies the links among the antecedent factors of the health issue, the intervention's goals and objectives, and the intervention strategies. Complete the worksheet from left to right, listing the following: 1) Antecedent Factors identified in your assessment process, 2) your theory of change (explaining why program components will bring about change), 3) program components, 4) indicators that will help monitor whether program components are being implemented as planned, 5) short- and long-term outcomes that the intervention is expected to bring about (short-term outcomes should correspond to objectives and long-term outcomes to program goals), 6) indicators that will serve as benchmarks of progress toward outcomes, and 7) sources of existing data or methods for collecting data to measure indicators.

**Example:** Sample logic model to reduce overweight and obesity rates among youth in the community.

| Antecedent<br>Factors  | Theory of<br>Change   | Program<br>Components   | Process<br>Indicators   | Outcomes  | Outcome &<br>Impact<br>Indicators   | Methods/Data<br>Source   |
|--|---|---|---|---|---|--|
| Knowledge levels about nutrition.  Eating habits established by parents and/or at home (e.g., sit-down dinners, parent/child cooking).  Access to fast food vs. healthier selections at school.  School funding (uses funds generated by sales of fast foods to fund lunch service program, sports, etc.). | What youth eat in schools affects their eating habits outside of school.  Some youth will change their eating habits if given healthier, appetizing, inexpensive options.  Publicizing changes in menu along with information on eating healthy will encourage students to eat healthier. | Provide nutrition and cooking classes for students and parents.  Offer more healthy food options on school lunch menu and in school vending machines. | No. of nutrition and cooking classes offered.  No. of people attending cooking classes.  No. of healthier food options on menu.  No. of healthier food options in vending machines.  No. of parents involved in cooking meals with their teens. | Short-term Students and parents have increased knowledge of good nutrition practices and how to cook nutritious foods.  Schools/ school board will adopt policies that promote healthier eating through nutrition classes, school cafeteria, and vending machines. No. of healthier foods, items sold increases.  Decrease in No. of foods sold with highfat, calorie, and sodium contents.  Increase in number of students who eat recommended daily amounts of fruits and vegetables.  Decrease in students' daily intake of foods with high-fat, calorie, and sodium contents. | Outcome Increased knowledge of good nutrition practices and how to cook nutritious foods.  Policies regarding nutritional content of school meals.  Cafeteria and vending machine sales.  Servings of fruits, fruit juices, and vegetables yesterday.  Servings of foods high in fat, sugar, and sodium.  No. of times a student ate a meal at a restaurant.  No. of meals from fast food restaurant. | Pre- and post-tests administered to nutrition/cooking class participants.  School district records.  School food service sales receipts.  Student food logs. |

| Antecedent<br>Factors | Theory of<br>Change | Program<br>Components | Process<br>Indicators | Outcomes  | Outcome &<br>Impact<br>Indicators | Methods/Data<br>Source |
|-----------------------|---------------------|-----------------------|-----------------------|---|-----------------------------------|------------------------|
|                       |                     |                       |                       | Long-term Reduce the proportion of teens who are overweight or obese. | Indicators Impact % Overweight.   |                        |
|                       |                     |                       |                       |   |                                   |                        |

#### **Worksheet 11: Communications Work Plan**

Use this worksheet to create a plan, or road map, for the coalition's media and communications activities. Start by listing the different messages the coalition has developed in the left-hand column. For each message, list the target audience, strategy for communicating the message, and time frame for it. Some messages may be used for more than one target audience or communicated using several different strategies. It may be necessary to use arrows when completing the first three columns. In the Resources Available section, try to identify coalition members or other colleagues who might be able to connect the group with in-kind services or free advertising. Lastly, identify resources that need to be obtained (Resources Needed), such as supplies, specific expertise, and skills. These items should be factored into the cost. Some research may be needed to complete the cost column. For example, the coalition should research the cost of creating printed materials, placing a print ad, or running a radio spot.

| Message | Target<br>Audience | Strategy | Time Frame | Cost | Resources<br>Available | Resources<br>Needed |
|---------|--------------------|----------|------------|------|------------------------|---------------------|
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |
|         |                    |          |            |      |                        |                     |

Atlanta, GA: 2004.* 

#### **Worksheet 12: Communications Evaluation**

Use this worksheet to plan the coalition's evaluation of its media and communications strategy. This exercise will help to identify benchmarks of success for each strategy and sources of data for measuring the benchmarks.

| Message | Target<br>Audience | Strategy | Evidence of<br>Success* | Data Source <sup>†</sup> |
|---------|--------------------|----------|-------------------------|--------------------------|
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |
|         |                    |          |                         |                          |

\*Examples:

- Increase in people enrolled in program
- Increase in knowledge
- Increase in coalition members

tExamples:

- Enrollment forms
- Surveys/Qustionaires
- Membership lists

Atlanta, GA: 2004.* 

#### **Worksheet 13: Message Development**

Use this worksheet to help develop media messages for different target populations. By identifying where the target group is most likely to seek health information, and how it currently perceives the health issue, as well as identifying best practices for communicating health messages, the coalition can tailor its media messages and determine the best communication channels for reaching its intended audience. Some research (e.g., conducting focus groups or literature reviews) may be necessary to complete this worksheet.

| Information<br>Sources | Perception of<br>Issue | Places to<br>Reach | Cultural<br>Issues/Barriers   | Research<br>Shows                   |
|------------------------|------------------------|--------------------|-------------------------------|-------------------------------------|
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |
|                        |                        |                    |                               |                                     |

#### **Worksheet 14: Current Financial Standing**

Use this form to allocate expenses to your various funding sources. The left-hand column should list all expenses, including salaries, supplies, space rental, utilities, etc. Under each funding source, list either the dollar amount or percentage that is going toward each budget item.

| Expenses            | Amount<br>Budgeted | Funder #1:          | Funder #2:         | Funder #3:          | Donations           | Income from<br>Events and<br>Product<br>Sales | Membership           | In-Kind           | Totals           |
|---------------------|--------------------|---------------------|--------------------|---------------------|---------------------|---|----------------------|-------------------|------------------|
| Salaries            |                    |                     |                    |                     |                     |   |                      |                   |                  |

#### **Worksheet 15: Future Expenses and Income**

Use this table to list projected expenses (the amount of money the coalition expects to spend in the coming fiscal year, broken down into established categories), projected income by source (the amount of money the coalition expects to have for the coming fiscal year, broken down by sources such as fundraising, memberships, and sales), and the interaction of expenses and income. Funding sources can be separated into general categories (e.g., fundraising, memberships, donations) or into more specific categories (e.g., the department of public health, the Health Foundation). Also, make sure to build in flexibility to make adjustments as the year goes on.

#### **Worksheet 17: Grantwriting Grid**

Use this grid to gather information about potential funders. Completing this form will help determine which funders are strong matches and help you create a timeline or work plan for writing proposals based on their funding cycles. It is helpful to have information on hand as the funding needs change across time. List the name of the funder in the top row and fill in answers in the columns below.

|   | Potential Funder |    |    |    |  |
|---|------------------|----|----|----|--|
|   | #1               | #2 | #3 | #4 |  |
| Applied to this source in the past?(Y/N, date, result)                      |                  |    |    |    |  |
| Funder's priority<br>area(s) that match<br>coalition goals                  |                  |    |    |    |  |
| Has funder made<br>awards to similar<br>projects in the<br>recent past?     |                  |    |    |    |  |
| Areas funder tends<br>to support (start-<br>up, capacity<br>building, etc.) |                  |    |    |    |  |

# Worksheet 18: Background for Writing a Grant Proposal

| Provide a clear description of the coalition's mission and goals and the project the group hopes to carry out with the requested funds.  |
|--|
|  |
|  |
|  |
|  |
|  |
| List past accomplishments (e.g., needs-and-assets assessment, youth development work) that provide proof of the coalition's ability to carry out the proposed project.   |
|  |
|  |
|  |
|  |
| List at least three reasons why the targeted Critical Health Objective (or cluster of objectives) is important – to the coalition, the community, and the potential funder.  |
|  |
|  |
|  |
|  |
| Describe why the approach was selected. How is it known to be effective (e.g., it is based on a successful model, is it supported by research)? How is it innovative? What criteria will be used to measure success? |
|  |
|  |
|  |
|  |
|  |

| List at least three reasons why the coalition's project demonstrates a strong commitment to the community (i.e., that the coalition is dedicated to working with and within the community to effect positive change).  |
|--|
|  |
|  |
|  |
| Provide at least three clear reasons why the approach will be effective for the population   |
| and community.   |
|  |
|  |
|  |
|  |
| Provide three reasons why the group is interested in this particular funder. How does the coalition's project relate to the funder? How will involvement in this project benefit the funder? For example, will it help it demonstrate its connection to the community;? Does it fit its mission? |
|  |

#### **Worksheet 19: Assessing Program Readiness for Evaluation**

The purpose of this form is to assess whether a program is ready to conduct a formal evaluation or whether additional program changes are needed. This form should be completed by program managers and staff and by coalition members. The assessment can be completed as part of a staff meeting or coalition meeting. After compilation, the answers will be used to help decide which aspects of the program need work to improve its readiness for a more thorough assessment.

Answer the following questions using a scale of 1-5. Space is provided below each question and at the end of the form to list suggestions for improving the program. Respondents are encouraged to answer questions as honestly as possible. The forms can be completed anonymously.

|   | Not at All |   | Somewhat | Οι | ıtstanding |
|---|------------|---|----------|----|------------|
| The program/agency has been successful in retaining staff for 1 year or longer. | 1          | 2 | 3        | 4  | 5          |
| If not, why?  |            |   |          |    |            |
| Staff know the program's goals, objectives, and target group.                   | 1          | 2 | 3        | 4  | 5          |
| If not, why?  |            |   |          |    |            |
| Staff have all the skills they need to implement the program.                   | 1          | 2 | 3        | 4  | 5          |
| If not, why?  |            |   |          |    |            |
| Staff feel supported by management.   | 1          | 2 | 3        | 4  | 5          |
| If not, why?  |            |   |          |    |            |
| Staff are given the opportunity to suggest program changes.                     | 1          | 2 | 3        | 4  | 5          |
| If not, why?  |            |   |          |    |            |
| Staff are enthusiastic about the program.                                       | 1          | 2 | 3        | 4  | 5          |
| If not, why?  |            |   |          |    |            |
| The community is involved in developing the program.                            | 1          | 2 | 3        | 4  | 5          |
| If not, why?  |            |   |          |    |            |

| The coalition seeks input from community members in revising the program. | 1      | 2     | 3         | 4         | 5         |
|---|--------|-------|-----------|-----------|-----------|
| If not, why?  |        |       |           |           |           |
| Youth are involved in program development.                                | 1      | 2     | 3         | 4         | 5         |
| If not, why?  |        | 11 00 |           |           |           |
| The coalition seeks input from participants in revising the program.      | 1      | 2     | 3         | 4         | 5         |
| If not, why?  |        |       |           |           |           |
| Sufficient time is available to deliver each program component.           | 1      | 2     | 3         | 4         | 5         |
| If not, why?  |        |       |           | 541       |           |
| Supplies/physical resources are available to deliver each component.      | 1      | 2     | 3         | 4         | 5         |
| If not, why?  |        |       |           |           |           |
| Each component is delivered as planned.                                   | 1      | 2     | 3         | 4         | 5         |
| If not, why?  |        |       |           |           | ,         |
| The following steps can improve staff rete                                | ntion: |       |           |           |           |
| 1)  |        |       |           |           |           |
| 2)  |        |       |           |           |           |
| 3)  |        |       |           |           |           |
| The following steps can improve staff und and target population:  1)      |        |       | program's | goals, ob | jectives, |
|   |        |       |           |           |           |
| 2)  |        |       |           |           |           |
|   |        |       |           |           |           |

#### Worksheet 20: Evaluation Timeline/Work Plan

Complete this timeline to determine what resources are available and what people, organizations, tools, etc. will be needed to conduct a program evaluation. Examples of tasks this timeline/work plan might include are to: decide on evaluation design, create/research data collection tools, recruit comparison/control group, train staff/community members in evaluation skills, obtain consent, pilot tools, collect data, analyze data, present findings.

| Task | Time Frame | Resources Needed<br>(e.g. staff time, school<br>approval, specific skills) | Persons<br>Responsible |
|------|------------|--|------------------------|
|      |            |  |                        |
|      |            |  |                        |
|      |            |  |                        |
|      |            |  |                        |
|      |            |  |                        |

#### **Worksheet 21: Process Evaluation Planning Tool**

The purpose of a process evaluation is to determine how well the program was actually implemented by comparing it with the original action plan. It examines whether a program has stayed true to its design and the extent to which it is producing all the materials and services promised. The left-hand column lists several questions that process evaluations often seek to answer. First select the questions to be used in the process evaluation, then use the subsequent columns to list the data the coalition can collect to answer the questions, sources of that data, and baseline measures that help gauge whether the program is achieving what it set out to do. The form is partially completed to provide examples of possible data and baseline measures.

| Evaluation<br>Question   | Data Needed to Answer the Question  | Data Source   | Baseline Measure   |
|--|---|---|--|
| Are appropriate personnel, equipment and financial resources available in the right quantity, in the right place, and at the right time to meet program needs?  If not, what barriers exist? | <ul> <li>Staff skills, education,<br/>and training</li> <li>Staff productivity</li> <li>Perceived barriers</li> </ul>   | Resumes     Staff activity logs     Schedules of program activities     Interviews with managers and staff                    | Job descriptions     Staff work plans     Program activities |
| Is the program providing the expected services and reaching the target population?   | <ul> <li>No. of program components implemented (No. of classes implemented, No. of events held, etc.)</li> <li>Participant characteristics (age, sex, race, neighborhood of residence, etc.)</li> <li>No. of sessions in which persons participate</li> </ul> | Program activity logs Participant registration forms Participant sign-in sheets for each activity  Participant sign-in sheets | Action plan/program plan     Grant proposal or program plan  |
| How well is the program meeting the needs of participants, their families, and staff?  | Participant, parent, and<br>staff satisfaction with the<br>program  | Interviews with participants, parents, and staff     Client satisfaction forms  | Needs-and-assets<br>assessment data                          |
| Are the activities being completed on time? Was sufficient time given in the timeline to reach the selected objectives?  Are we reaching our target population?                              |   |   |  |

| Is the program delivering an appropriate quantity of services? |  |  |
|--|--|--|
| Is the program being implemented as planned?                   |  |  |

#### **Worksheet 22: Evaluation Data Planning Tool**

Outcome and impact evaluations indicate whether an intervention or initiative has accomplished its short- and long-term goals, respectively. This form helps identify what data need to be collected for the evaluation. List short- and long-term outcomes in the left-hand column, then list indictors for each outcome, sources of existing data, and the method that will be used to collect new data. Much of the information needed for this worksheet can be taken directly from the logic model worksheet.

|   | Indicators   | Data Source             | Data Collection<br>Method |
|---|--|-------------------------|---------------------------|
| Short-Term Outcomes:  Example: Schools/school board will adopt policies that promote healthier eating through enhanced nutrition curriculum, as well as changes in the schools' Good Service program and foods sold through vending machines. | Policies regarding nutritional content of school meals | School district records | Records review            |
| Long-Term Outcomes:  Example: Reduce the proportion of teens who are overweight or obese.   | % of overweight teens (ages 10-19)                     | County health profile   |                           |
